

How To Use

Preparation of Solution

- Take 5 ml of L-44F and mix it with 1 liter of potable or RO water in a sanitized container.
- Stir well to ensure uniform mixing.

Dipping Process

- Fully submerge the pomegranates in the prepared L-44F solution.
- Keep them dipped for 10 minutes to allow effective contact.
- After the contact period, remove the pomegranates from the solution.

Drying

- Let the fruits drain naturally and air dry.
- Use a fan if faster drying is required.

Shelf-Life Extension

- Treated pomegranates can have an extended shelf life of 10–12 days.
- Store at room temperature or under refrigeration for best results.
