

### **Preparation of Solution:**

- Take 5 ml of L-44F and mix it with 1 liter of potable or RO water in a sanitized container.
- Stir the solution well to ensure uniform mixing.

### **Dipping Methodology:**

- Fully submerge the pomegranates in the prepared L-44F solution.
- Ensure that the pomegranates are completely covered to allow even contact with the L-44F solution.
- Let the pomegranates remain dipped in the solution for 10 minutes.
- After the contact period, remove the pomegranates from the solution.
- Let them drain naturally and air dry (use a fan to dry faster if needed).

### **Storage Conditions:**

- Store at room temperature or refrigeration temperature for an extended shelf life.
- Avoid direct exposure to excessive heat or moisture to maintain freshness.

### **Shelf Life Enhancement:**

- The treated pomegranates will have an extended shelf life of **10 to 12 days**.
